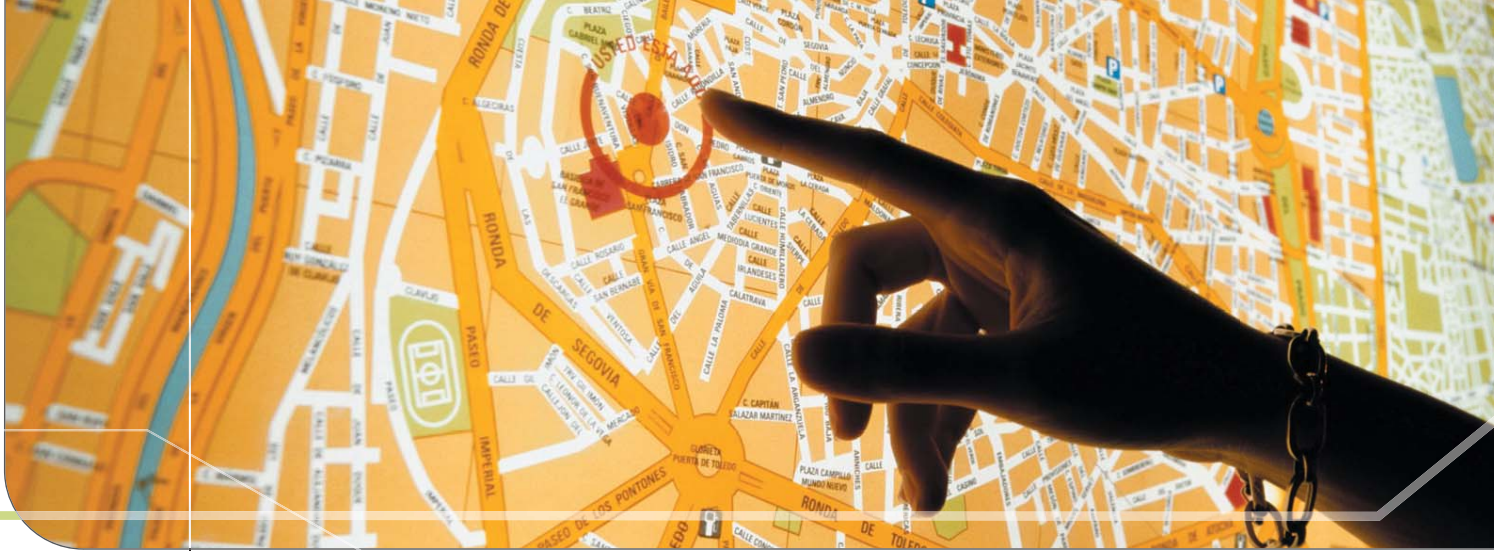
- **Optional RDS/TMC (Traffic Message Channel) receiver :** Receive real-time traffic information to avoid traffic jams in Western Europe.



GPS — the new way to go

It's a moving world; whether for pleasure or business, more people are traveling to more places than ever before. When you're out of town or traveling in a foreign country, finding the right way to your destination can be challenging. Whether it's your vacations, business trips, or a visit to your friend, you want to enjoy the trip, see the sights, and arrive safely on time.

Thanks to GPS (Global Positioning System) technology and digital maps, now people can easily find their way with the help of the satellite navigation devices.

NOVOGO GPS – Your wise choice in personal navigation

With the emerging applications of GPS technology, a personal navigation device will become as basic as a cellular phone. NOVOGO, a leading-tech manufacturer of Personal Navigation Devices (PND), provides you an all-in-one car navigation device which features user friendly software, ultra smart functions, and advanced navigation technology. NOVOGO T series Navigator makes navigation fun and easy.

Stylish outlook with merely 19 mm in thickness

Through the T series Navigator, NOVOGO, a manufacturer and expert in GPS technology, have provided users with a product which is stylish and unique. Its sleek and elegant exterior is derived from our professional belief that nowadays people want more than just innovative technology; design is just as important as functionality or performance. This ultra-portable T series navigator with a slim bodyline of merely 19 mm in thickness can suit any car interior and fit easily into a pocket or hand bag.

Easy to use

"PLUG and GO!", you can use the T series navigator straight out of the box without any complicated product registration or activation process. The Intuitive Graphics User Interface (GUI) ensures you can begin to enjoy your navigation experience immediately without even reading the user manual.

Simply tap "Find" in the main Menu, as soon as you pick a destination, NOVOGO will immediately show the Cockpit screen and start navigation.

Clear voice instructions and dynamic volume

A complete set of clear turn by turn voice instructions under all variety of road situations can be listened to in 19 different languages through the NOVOGO T series high quality speaker. The volume of the voice instructions will automatically increase as the car speeds up and decrease as it slows down enabling the driver to hear voice instructions over the engine noise.

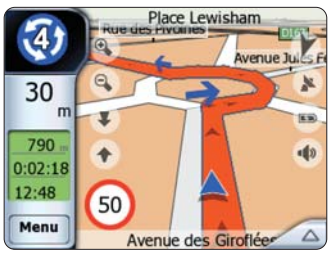
High performance SirF Star III 20 channel GPS Receiver

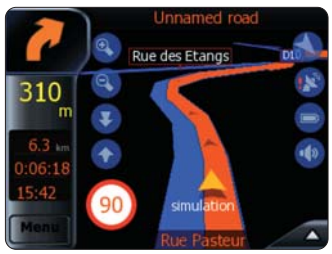
NOVOGO T series Navigator has built-in the high sensitivity SirF STAR III 20 channel GPS receiver, which will catch the GPS signal quickly and can receive the GPS signal in bad weather or within high buildings ensuring uninterrupted navigation.

Stunning 3D navigation view & auto-switch to day/night view

NOVOGO T series Navigator has the most brilliant 3D navigation view you can find in the market. You can also tailor the 3D view angle in real-time by the tilt button.

The T series can automatically switches between day and night views. This unique function can calculate the exact times of sunrise and sunset on any particular day at any particular location, and switch between the day/night colors schemes a few minutes before sunrise, when the sky has turned bright, and a few minutes after sunset right before it gets dark.





Zoom out to the earth view

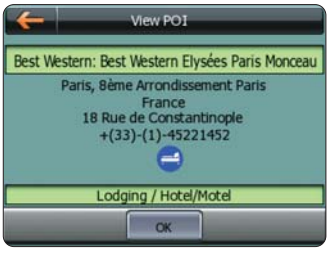
Do you want to know where you stand on earth? NOVOGO T series Navigator provides an unprecedented zooming function which allows you to look at your position from space within seconds.

Optimized Multi-destination route planning

The Advanced Route Optimization function, which most of the other navigators do not have, is a unique function of the NOVOGO Navigator. If you want to visit several destinations on your trip, the Optimized multi-destination route planner will help you optimize the order in which you will drive through those way points to save you time and fuel.

Abundant POIs (Point Of Interest) with phone numbers included

NOVOGO T series Navigator has built-in the most abundant POIs database including hotels, restaurants, gas stations, shopping centers...etc. also have phone numbers included. Along the journey, you can choose hotels around your GPS position or destination; just make a phone call to check pricing and availability before you arrive. You can even enjoy last minute discounted pricing!

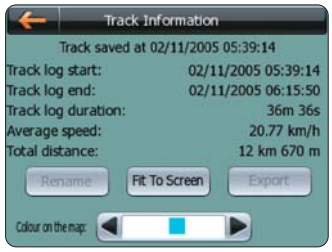


Support full zip code search in UK

You can find your destination easily with full zip code search support.

Off-Road Navigation (Record your trip)

Using NOVOGO T series Navigator, it is possible to save the track logs of your journeys. When you venture to some areas without roads, e.g.: forest, mountains...etc. you can record the route and get back to your starting point easily. This is also a valuable feature when you are in a foreign country where detailed maps are not available. You will seldom find this function in other navigators. If you use a company car for business travel, you can also use these track logs for gas expense reports. The screen below lets you manage all your track logs by showing a list of all track logs already saved. You can export the data to the SD card in GPX format for post-processing needs.

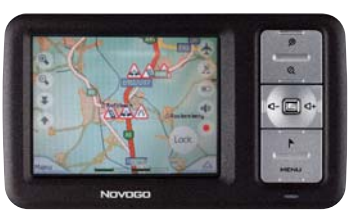


Speed Limit Warning

NOVOGO T series Navigator has included the information regarding the speed restrictions of most roads. This feature is able to warn you if you exceed the current limit and save you from driving too fast and speeding tickets. You can also customize the parameters used by the speed warning.

Real time free RDS/TMC traffic information (in Western Europe only)

The optional RDS/TMC receiver can receive the latest traffic information by radio broadcast and enables the dynamic route calculations to avoid traffic jams or accidents. You will never be trapped in the traffic jams again, making your journey a much more pleasant experience!



Novogo T series Specifications (T700/T900)
